

# STREET TREE FACT SHEET

## DWARF FLOWERING GUM

### BOTANIC NAME

*Corymbia ficifolia* 'Wild Fire'

### DESCRIPTION

- A grafted (dwarf) form of a very attractive and popular evergreen native tree which flowers during the summer months.
- Flower colour is guaranteed as it is a grafted specimen.
- Being much smaller than the original *Corymbia ficifolia*, it is well-suited as a street tree.

### WHY HAS THIS SPECIES BEEN CHOSEN?

We have selected this tree because it is:

- native
- drought tolerant
- fits with the general environment of the street and suburb
- can be planted under powerlines.
